Dearest,

Received yr. letter last night & hear from various quarters that the guests are delighted with everything, even the East Wind in the gulf - I am sure you have added no little to the success - you are so very thoughtful & kind, don't worry sterling about being behind in some things, it is hard I know - I am sure like Cal dear who has given himself entirely to investigation & let nothing interfere, never could have done what you have done in helping on the college & training men who are now doing you credit - It may not show so much but it is perhaps a greater & better work if taken at its true value - I feel in saying so on knees better than I know to make strangers comfortable & happy & it is true -

We are all looking forward to  
having you here again soon  
full of Magare. Please out recel.  
lections. I trust - & the doctors off-  
to themselves. I am in no

hurry. Love probably stay at the  
end

the experiment on the 10th  
selected in letter to the 10th

of our case so very interesting  
I trust, about every thing about  
being behind in some things, to

about a house. I am sure like the  
other who has given himself in

truly to investigation I let nothing  
interfere, never of course when you

you have been helping in the  
labor & learning when you are

doing your best - the way out of  
no matter how it is perhaps a

greater & better work of labor  
of the true value = I hope in  
saying so on these better things  
I hope to make progress in my  
I hope I will be
