

Litete Inlet

Aug 7<sup>th</sup> 1903

Dearest -

I enclose the enclosed  
just in a hurry & because I thought  
you sh<sup>d</sup> know it & might find  
occasion to speak to Col - about  
companions - People say that even  
Kessel - Brauns & others are habit-  
ual gamblers - I if there is any-  
thing in it - I sh<sup>d</sup> fear the College  
societies w<sup>d</sup> lend themselves all to  
well to such things - I hate to  
hear tales & wonder if true or not  
when I see the fresh boy's faces I  
cannot think evil of them. Yet  
to know such remarks being  
made - is horrible - I can see  
the lawless life they lead here is  
not - good - & the way the hal-  
l girls are allowed to do as  
they please is demoralizing.  
Mrs Levi - Amos is horrified at  
the least vulgar - behaviour of  
the girls & boys - I when you  
see the french lovers walking up  
& down at 9<sup>o</sup> at night - arms  
round waists, & then meet with  
& thrust of friend's daughters 14/15

also promnading, & exulting  
& singing - It is not nice. Now  
ever let us leave this unmanly  
subject - I have stopped Lois & you  
with B. Caverhill - I have no  
reason to doubt her being a  
nice child but Florence & the  
Petersons do not behave properly  
& do as they please - I do let  
Lois know of them in the letters  
she has quite outgrown from the  
society - It is rather badly off for a  
friend, she goes most with  
Aggy Taylor. I often plays golf with  
Keller or Brian -

Mrs Beck is clear looking  
very sad & worn & she has lost  
her cook which seems hard  
but she will make it do - she  
gives people more to her she  
has a black boy that she brought  
from the south who does all  
kinds of odd jobs & mends & plays  
with the children in the evening

Talley we have south down  
& rain - Mrs M. is better, but  
must not be quite so adven-  
turous - I think new potatoes  
were the cause of her present  
attack we could get no more  
old ones - I she is so fond of

the teacher - she refused to see Dr. Johnson at first  
or when she did, it was too pressing to hear their con-  
versation. Mr. Tolol Maini Dr. Haskin wd not keep her  
in bed, he said. Dr. Haskin was a kind man, but he  
was well known to most - great - I so on -

So far I do see that Dr. Johnson's refusal was no  
N.Y.S. with nearly poisoning - I fear very little Dr. Haskin  
is staying in town on his accident -

Every thing seems on here much as several  
to-day is clear in the morning: N.S. looks much better  
I think & if he got the colds set to give a big - made out  
again after he got influenza in other ways, but the  
widespread F. Hops has been very kind & kind -  
Carrington & associates in his & calls N.S. - Corbin, was  
to his amusement -

Another is not looking very well. The  
not seem up to much. He has only received out  
and I feel see a great many people. I think  
existing letters to his up most - this other time

The good friend has been watching you, &  
has said let her stay. This is a human's fault society

they when no one feels very lively =

will seem secure says they see a number of others  
I not one has any good to say of Boston - It is  
a pity is it not? We have not been much

well - but as soon as I say is you are with  
I see something more - This really is not  
much else than when all are at the  
time is clear is always, nothing - I do not

accidentally getting more thoughtful, I hope  
word - that is the way they really are

listening - I don't know them to be so  
at - not a friend - I ask you that is what  
with the friend was -

Having done
