

GEOLOGICAL SURVEY OF CANADA

(Museum and Office, 76 St. Gabriel Street) MONTREAL.

St. May 1876

My dear Harrington.

I am glad to hear the report is finished. It is not much behind time as the act says "on or before the 1st of May" - You are quite right not to send it to Ottawa incomplete. As regards information for the Catalogue about the Morise works I don't know where we could get it unless from Rhind the Official Assessor or from Molson - The E. J. Copper mines there will also I fear be some trouble about, as none of them are I fancy making money - The Manager of the Grey Hill Mine is a very pleasant gentlemanly Englishman. He would I have no doubt give some facts as regards the best workings which have, he told me, been entirely confined to the "Laney Eliza lode" - but which has now pinched out. You will find his name in the letter book - About the end of March or early in April I wrote to him. For the Huntington and Anton mines we must apply to the Managers & see what facts they are able or willing to give. I can get from
