No 37 Bay St Vall.  
Hamilton 20th May.  
My Dear Sir.

I am thinking  
of going to Europe this  
summer for nine weeks  
as those are all the  
holidays that I can get.  
I will visit London  
also Cornwall and  
Swazip; - Paris and  
ce. Would you be kind  
enough to give me some  
of the names of the  
most interesting places  
in the North of France  
and Belgium, and west  
of Germany ~~tho~~ as well  
as those in England.

which would be of greatest  
interest from a professional  
or scientific point of  
view.

In some respects I like  
my situation here very  
well, but there is so  
little latitude in teaching  
science, as it is all  
a cram for minute  
examination on elementary  
work. The examiners  
in science in Toronto  
are all book men, and  
their questions are not  
half so fair as those  
given by you and the  
others for the school  
examinations. Another  
disadvantage I labour  
under is that I do not  
get the best of the pupils  
in my classes as those

are exempted on account  
of the Classical or language  
course. But I have had  
three or four good science  
pupils this session who  
have been studying here  
for London or the second  
year in Toronto University.

If it would not be too  
much trouble I would be  
glad if you would give  
your advice as where  
I had best visit.

Yours sincerely

J. W. Mearns
