Dear Sir,

I send you to day a piece of Amber phosphate from the Township of Wakefield. It is a very rare variety in this section and I have met very few persons who have ever seen any of it. If you would be kind enough to let me know whether it is as rich as the blue and green phosphate you would oblige me, and also what element it is that gives it the yellow color. Some persons think it is oxide of manganese.

Wm. Hamilton
