

Victoria Chambers
Ottawa March 18

Dear Dr. Harrington,

Yours always
welcome favor I received
the latter part of last week
at Buckingham. I was
indeed sorry to learn that
you had been so unwell.

I congratulate you on your
recovery, and that you are
again able to resume your
lectures.

I am leaving in the
morning for Portland and
expect

to be about about a week:
by that time the box of
Specs, will have arrived, and
I shall at once forward you,
altho' I know quite well they
won't count for much.

Botany is the strong point
in Porto Rico -

I am not quite certain
whether or not I shall return
there, but in any case I
must go to Montreal, and
then it will give me great
pleasure to go over the
ground with you.

I see by the papers &

There are quite lively times
respecting the removal of
the Survey Museum from
Y. City. The people here
think it will be much more
useful here than with you.
"Put not your trust in princes"
He appears to be as true
now as in the days of the
Hudayfaed King - and I
presume will even be with
those who make politics and
policy their business and
aim.

I am glad you received
the spec of Apatite, and

trust it is worth the expense
of receiving. They were the
nicest specimens of Ap I
have seen tho' now Mah
Phos is coming out at the
rate of 2 or 3000 tons in
a season some handsome
blocks should be found.

With best wishes

believe me dear Sir

Yours & Vindictive
John G. Miller
