

Montreal 29th August
1882

14. Victoria St.

B. G. Harrington Esq
Dear Sir

I am desirous of
obtaining samples of
Copper Ore from the
Huron Bay Copper
Mine Location Lake
Huron - Mr White
formerly of the survey
department here mentioned
that you could possibly
put me in the way of

ing them either here
or at Ottawa - The reason
I enquire for them is
that I am trying to sell
the Huron Bay Mine
Location for the copy
here - and the person
who is negotiating the
matter in New York
wishes samples of
the Copper ore - I wrote
up to a party at the
Bruce Mines two weeks
since on chance but
did not get any reply
he is seldom there

I am one of the stock
holders in the mine
myself, as the time
that the mine was
bonded to me expires
shortly I should like to
get them soon - If I
cannot obtain samples
here, would you have
any objection to write
a few lines to some
one connected with
the Geological Survey
at Ottawa as a friend
of mine may be going
up there this week

and he could ^{Andrew Morris} get them
I have heard of several ^{Aug 29/82}
complaints about the
want of a Geological
Museum in Montreal
where it should be

Any information you
can afford me will
much oblige

Yours truly

Andrew Morris

G. B. Harrington Esq
Professor of Chemistry
McGill College

please send me the note for
Ottawa I might soup myself
