 LONDON, ENGLAND, 20 BUCKLESBURY, (ROOM 366.)

Dr. B. J. Harrington,
 McGill University,
 Montreal, Canada.

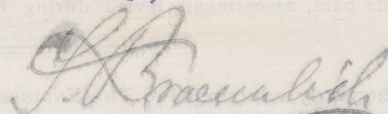

Dear Sir:

A gentleman in Paris, France, has written us that he desires to publish a French edition of "Systematic Mineralogy" by Dr. Hunt, and we lay the matter before you.

Of course, it goes without saying that we could not pay the same royalty on the French edition that we do on the American edition, for the expense would be great and the French people would allow us scarcely anything, if anything at all; so that we will be obliged if you will advise us if you wish this book translated into French without making a demand for royalty on the translation.

As soon as we hear from you we will communicate with the gentleman in question.

Yours truly,

Business Manager.

JAN. 27, 1894, 1893

"INDISPENSABLE REFERENCE BOOK."

THE MINERAL INDUSTRY,

ITS STATISTICS, TECHNOLOGY AND TRADE

IN THE UNITED STATES AND OTHER COUNTRIES.

Scientific Publ. Co.
Jan 27/94

Vol. I, From the Earliest Times to the Close of 1892, \$2.50.

Vol. II, " " " " " " " " 1893, \$5.00.

BEING THE ANNUAL STATISTICAL SUPPLEMENT OF THE ENGINEERING AND MINING JOURNAL.

These large octavo volumes are the most important contributions to the statistics of the mineral industry ever published.

They describe the occurrence and character of deposits in which the useful minerals are found; the characteristics of the mineral; methods of mining treatment; characteristics of metal or other products; costs; uses; statistics of production; imports and exports; consumption total and *per capita*; review of mineral, metal and mining stock markets.

Extremely valuable technical articles by the most competent authorities give the recent progress in each department of mining, metallurgy and the chemical industry, and thus supplement and bring up to date all the technical books. The tables of itemized cost of production of many of the minerals and metals afford information of the utmost value to all interested in the industry.

These are the only works published in any language that give the Statistics of the Mineral Industry of the World, and the only works that give the Statistics of the United States for 1892 and 1893.

The subjects treated include: Acids and Alkalies, Abrasive Materials, Alum, Aluminum, Antimony, Arsenic, Asbestos, Asphaltum, Barytes, Bauxite, Bismuth, Borax, Bromine, Cadmium, Chemicals, Chromium, Clay and its Products, Coal, Cobalt, Copper, Copperas, Corundum, Cryolite, Feldspar, Fluorspar, Gold, Graphite, Gypsum, Infusorial Earth, Iron, Iron Ores, Lead, Lead White, Limestone, Litharge, Lithographic Stone, Magnesium, Manganese, Mica, Natural Gas, Nickel, Ochre, Onyx, Ozokerite, Petroleum, Phosphates, Phosphorous, Platinum and Platinum Minerals, Precious Stones, Pyrites, Quartz, Quicksilver, Rare Metals, Silver, Soda, Sodium and Potassium, Steel, Sulphur, Talc, Tin, Tungsten, Zinc, Zinc White, etc. Fluctuations in the prices of mining and other stocks. Dividends paid, assessments levied during 1893 and previous years, etc.

The yearly subscription to THE ENGINEERING AND MINING JOURNAL is \$5.00 in the United States, Canada and Mexico; for other countries in the Postal Union, \$7.00.

THE SCIENTIFIC PUBLISHING CO., PUBLISHERS,
