PRESIDENT'S ROOM

Nov 28 18 98

My dear Dr. Harrington:

I have  
been hoping and planning for  
several weeks to make the  
trip to Montreal to be present  
at the official opening of your  
new laboratories, a trip which  
would have all the more pleasure  
for me in consequence of your  
very kind personal invitation.  
But, alas, unexpected duties  
have made their appearance  
and demands, and I now find

The month of December full  
of engagements that cannot  
be put off.

I congratulate you most heartily  
on your new acquisition and  
on your new opportunities for  
good work, and thank you most  
heartily for your wish to have  
me take <sup>present</sup> part at the your  
opening ceremonies. May they  
be a happy augury of a long  
and useful life of the Chemical  
Department of the <sup>City</sup> University  
and of its distinguished head.

With warm regards, believe  
me most cordially yours

J. M. Brown

To  
Professor A. J. Harrington Ph.D. &c  
Montreal, Canada.
