

I have kept the part of Dallas part of them
relating to the plates, as the rest of them
has not arrived; but I shall
return it next week
whether they come
or not.

Dear George

I wrote to you on
Tuesday about Ramsay's
offer, and about the
paper & specimens in the
hands of Dallas. I
trust you received the letter.

With regard to the
Course of study, I would
not think of the "Metallurgical
Journal" at all. "The
Mining and Smelting" is
what you will make
a pay. I would therefore
I think try to pop in
that ~~part~~ for the Associate
ship, and take at
same time what Nat.
Hist & Pol. you can.
I am now speaking
irrespective of the Neddy's

But if you think you
have a good chance
of it, I would not
object to your taking
the Sci. Degree for
you immediately, and
then taking another
year for mining ^{& assaying} or *
as I do it thoroughly,

I think you must
leave the chemistry
and metallurgy for
the present. Of course
I do not mean the
assaying which is in the
mining course, and if
we pay you might
take your place in
that.

* still the chance of the medal is perhaps not
with the substantial benefit of the mining certificate.
This is different from my last advice but generally
one thinks more of the practical

I have just got a
letter from the Revy
Royal Socy saying they
cannot at present pub
lish my paper, I have
written to ask for the
M.S. to be published here,
and have authorized
Dr C. S. & receive it
for me. I have said
to him that you will
take it and forward.

Please pack it up
in two parcels, the
M.S. as a letter - the
drawings as a book,
and be pay by
Canadian steamer.

I may be sure
things have recently made
side of these things.

days before Sir Charles
can get it — so there
is no hurry; but
when you have time
to call, please say
that I desired you
to ask for it; and
inform me of the
answer if he has
not got it.

I shall remit to
you by mail at the
beginning of May, trusting
that you have money
enough till that time.

I have said to
Penny that you will
see him about the field — and
and take his advice }
W. Dawson
