Dear Senger

I spent a few days
Apr the notes on your dried
fungi, also your original plates
all of which I had supposed
were sent to you some
time ago. I was unable
then as you might
wish to say something
about them & the
moss club.

I received the plates
all right for Dollars
and have returned them
with certificates.

I have also got
my drawings back for
the fee by and they are
now in hands here
They will be better done
than in London and

I shall be glad if you will mention anything you may hear from Cornell
the prospects about St Albans. I regret I cannot have it for as it is
like a narrow river
I wish to know how
and if he
can take
any part
of it

If your parcel is small it may be sent
 to Europe by sea via Fleet St. with a note
 stating its general contents requesting them
 to forward. Of course, send it to Chelmsford or
 at Liverpool who will forward it. This will
 be the best. Survey will be
 two copies for a Report
 which will be of use to
 them and we have
 done.

I have the prospect
 of doing a little Survey
 this Summer in Feb. 9
 and it was with reference
 to this that I asked
 you about being, not that
 I am to be but they
 wish information. I shall
 hope to get up an interesting
 account of the Isles of the
Channel and its fossils. This
 will be in Feb and May.

I am a little surprised
 that you have not heard
 from Hanning, it might be
 best to speak to him and
 remind him of the matter,
 I send 20 of exchange for
 £40. just sent last week long post
 from Widow

be left under them say & the east end of this aspect of the London River
