

M. Gill College.  
Montreal.

Sept-13/72

Dear father,

Your telegram  
 arrived yesterday, and  
 gave us the pleasant  
 assurance of your safe  
 arrival. I hope you  
 have had and are  
 having better weather  
 than the rainy time  
 we are having here.  
 Mamma came home  
 to-day all well. A  
 letter arrived this  
 morning from Mr. Dubu-

including \$25 for you,  
about Guile put in  
the Savings Bank, I  
have also an application  
from some people in  
Manchester, Supd, to  
explore Phosphate  
properties in Orange.  
I have said to them  
that you may at  
least to it when  
you come home  
of your work.

I think it will be  
well, when you are on  
Dart St, to take samples  
of limestones, and  
get from them the  
position of the several  
beds. The purest I  
know, as well as  
the most careful,  
is that at his place  
at Springville; but  
there may be others  
that would be of  
value.

Please also to

say to Pimire that I would  
like him to ask his  
man Mr. Kimmie at Riversdale  
to send me a lump of the  
limestone from the Calvary  
R. There may be pieces  
at the old Lime-kiln which  
I hope to visit when I  
was there. <sup>Just to know if</sup> it has any <sup>possibly</sup>  
<sup>microscopic or otherwise</sup>

We are all well,  
and send our love  
to you

If you need money  
please ask Mr. Pimire  
to advance it; and I  
shall remit you the  
immediately on receipt of  
advice. With all love  
your affectionate father  
W. D. Swann
