

McGill College,
Montreal.

Sept 29/72

Dear George

Reverie leaves
for Peter on Monday, and
I think we may and
I have arranged matters
pretty well with him,
if the Peter friends
will agree. I now write
about several matters
which I wish you to
think of, before
P. comes down, & shall
catalogue them thus.

1. Fraser should be spared
if possible to visit the lots
103 to 107 between the Donald
Weaver & Slangany - our rights
expire early next spring and
our titles must be settled
this fall.
2. If possible working over

& marked prominently

Should be agreed in the
areas 46, 49, 102, 108 if
any discrepancies have been
made either as to Area
title held in Limnaria. Wolms
knows about the unreversed
lots. Over 48, Wolms has
a second claim, but it would
be well to have an idea
where to claim after him.

3 Review all measured
ments of the to pts see,
so as to make a definite
report independent of Roberts,
and collect facts as to
cost of excavation ^{& carrying} of lime.
stone, railroad see

4 I shall send a
map with Picture. By
mark in it your pts see,
new drawings, and

Give him also tracings
in large scale of any
measurements or
one = beds.

5 Try to find out if
any thing can be done
as to Sumnerite or Grant's
John; and if nothing
can be done at least
mark the promising
place, on the map or plan.

It is very important
to keep all facts and
measurements that are
new, and we can
work them up here.
Pentree expects to

Bring Robertson with
him, and I hope
that after he leaves
there will be little
for you to do, and
that you may come
home. Come by land,
as the navigation is
chiefly & the unpleasant
after Oct 1st.

With all love
from all of us — all
wishing to see you soon

again, I am your loving
father

M. D. Austin
