Pictou 30<sup>th</sup> Sept 1872.

My Dear Sir

I Enclose a rough tracing of the Plan of Mining Areas. The Dates show the date of the License on Each & we have one year from the Date of the License to prospect & select our mine. On many of the areas however the year for prospecting Expires so Early next spring that the work will require to be done and the area selected this Fall.

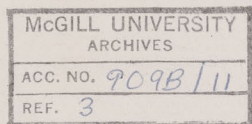

When James Holmes runs the line out from the River to the extremity of our Itebatas area (which line is marked on the Enclosed Plan N 55° E) please drop me a note giving the result and showing how it affects the position

of Webster's house as marked on the  
Enclosed Plan and whether the line  
runs in a good direction to embrace  
a good piece of the Western Extension  
recently discovered, of the Webster ore.

If anything good should  
be found of the limonite on Mrs  
Campbell's place please ~~telegraph~~<sup>write</sup>  
me and when Prentiss and his  
Engineer arrive drop me a tel.  
that they are with you. Oblige

Yours Truly  
Howard Finnick
