My Dear Sir

I acknowledge your  
Report last week, & have since  
rec<sup>d</sup> the samples & your letter  
of 15<sup>th</sup>. I am glad that there  
are good indications of harmony  
near & past Waterville, which  
of course you will have explained  
before the winter sets in, &  
that we may select an area  
which, in that quarter, must  
be done by April. It is thus  
one that gives satisfaction to  
people here, & another discovery  
would be of great service in  
settling our the difficulty about  
the disputed right at Saddlers.

I regret that D. Power should  
spend any more time about  
Blair's hands when there is  
important work else where.  
We have more than enough  
of this as feared for  
practical purposes. But  
you have no <sup>doubt</sup> good reasons which  
do not occur to me.

My paper here is most  
satisfactory. I have been less  
than a week here.

I could make no more  
until I had your report  
of facts - things you  
saw. Nothing else will  
go down with practical  
people. If any important  
discovery of limits should  
be made you should cable  
us.

It is very unfortunate that  
beyond ascertaining that  
the Linnæite & Spethic  
vein bed are a little  
thicker, nothing has been  
found. There are not any  
objections, but they are  
continually made to me.

I trust that you will  
make no objection for next  
summer without letting  
me know, as your kind  
services will be required  
by the private association.  
I am now going.

Yours truly

Edw Al Parson
