Re: Full College Montreal
June 21. 75.

Dear Major Cameron,

I enclose a general
inventory of the specimens in
my charge belonging to the
Commission, which I hope
will be definite ^{enough} ~~enough~~ for
your purpose.

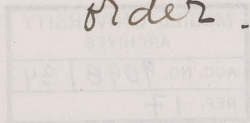

With regard to the fossils it
is impossible to give ^{precise} ~~definite~~
definite

Numbers, for labels in some cases
there are a great many small
specimens of a single species, which
it would be misleading to cumulate;
in others several imperfect specimens
require to go together to give an
idea of a single fossil.

I am at present devoting my
spare time to the further
arrangement of the ~~former~~
collections
specimens, & can arrange
to leave them here in safe

keeping to await your

order.

Henry Anderson
on Friday last - en route for England
Northampton 12 here

Yours very truly
Joseph D. Rowson

Mr. J. W. C. G. G. G.
June 21. 73.

numbers, for total in some cases
there are about twenty small
specimens of the large species
it would be interesting to know
in other cases whether specimens
agree to the type & for an
idea of the large fossil.
I am at present studying only
of one true to the fossil
now in my collection
I can arrange
to have them for you
I hope to meet you
