

M. C. Gill College,
Montreal.

Sept 7/77

Dear George,

I fear that in
our movements at this
season no letters may
have been written to
you for some time.

The latest received from
you is that from Little
Shuswap I., of July 28,
when you were about
starting for St Shuswap
in a canoe. I hope
you have by some re-
turned from that ex-
pedition in safety.

I returned to
Montreal last week,

Rankine & Coa followed
and are now here. Anna,
Warrington & Mamma & Mrs
are still at Netley, but
expected home this
week. We shall then
be all here except you,
and I suppose William
must leave before
you can return.

My little book
the "Origin of the word"
has just come out
here, and will ap-
pear shortly in England
& U. States. I hope to

will do some good, though
I expect no end of
abuse for it.

I have sent you
copies of your papers
in Geol. Mag., and
have marked a few
bleading persons here
& there, keeping the
rest till you return.

In your paper I
think I have settled
a number of disputed
points, and am
sending off to Solon

The MS of a supplement
to be ad sent. to bring
it up to date.

Matters are all as
usual with us here,
I hope we shall have good
claps. Prof. Bury has
arrived. Selwyn has
come back to town.
I hope you will be
able to leave in
good time, so as
to have time to
work up your results
and not to be hurried
so much as last
year. We all send
much love to you
and long to see you
again. Ever your loving friend
W. Darwin
