

Little Meets

July 19/81

Dear Sir,

I enclose in the  
 a letter from William,  
 and send by mail  
 a number of "Nature"  
 containing Newberry's  
 article on the Correlation  
 of the formations of the  
 N.W. which in the  
 main is right, unless  
 he is wrong about  
 the Laramies. He  
 seems also to ignore  
 the existence of the  
 Pierre & Fox Hill groups.

We had not seen the  
 results of your Peace  
 Survey explorations, except  
 the oral statement to  
 which he refers that  
 you had found plant  
 beds in or about the  
 sources of the Nile.

The same number  
 of Nature has several  
 other articles of interest,  
 on the Continent, &c.

We shall hope to hear  
 from you by and by,  
 but shall be patient  
 as you advise. Y<sup>rs</sup>

was however enveloping & knew that  
 you had reached the level, and  
 had found some old apartments  
 here.

Some books of pamphlets must  
 be for before left mentrest, but  
 nothing of much consequence, also  
 Deacons' Bills, which shows funds  
 open in pounds & pence, as also  
 say \$ 26 " " ,  
 Hence attacked & the  
 specimens of words, from script.

Got to the place on Saturday,  
and shall go on Monday to  
Camp Mehta, but return here  
in a week or so.  
To-day for the first time I  
visited the temple of this place,  
the Conception of the Virgin,  
also situated at it here.

Ever your affectionate  
father  
J. P. Brown
