

Hillfield,  
Gateshead.

Jan<sup>y</sup> 22<sup>d</sup> 1885.

My dear Sir,

Many thanks for yours  
of Jan<sup>y</sup> 5<sup>th</sup> enclosing specimens  
of *Loftusia* - from Dr. Columbia

- which I permit myself much  
pleasure & profit in examining -

This morning I have <sup>also</sup> a copy of  
a little paper from Principal  
Dawson, for which please thank  
him from me.

*Parkeeria* - I enclose half  
a dozen specimens of medium  
size - such as generally show structure  
best. Four are the ordinary spheroidal

forms; - two the compressed Nummulites  
-like variety from which I have  
never succeeded in getting any considerable  
traces of structure.

There are of course all infinitesimal  
specimens of late years than have  
been some found otherwise  
I can send you some if you need  
them. Believe me

My dear Sir  
yours faithfully & obly  
Henry B. Brady.
