

M. Gill College.
Montreal.

Sept 6 / 89

Dear George,

I returned from
Trenton yesterday and
met her from Notes,
so that we have
restored our home?
keeping here. Mamma
informs me she had
a letter from you from
Bancroft, but does
not mention what
had taken you to
that great city.

At Fronte many
American felogists
were asking for you,
and regretting your
absence, especially the
Washington men,
who had apparently
a pleasant remembrance
of your visit to that
city two years ago.
As I saw they
were making Canadian
men Tellus, as is

usual - I paid in
your membership fee
and Watcott had
your name put on
the list as Fellow
which gives certain
privileges in the Assoc.
The next meeting is
to be at ~~Memphis~~
Indianapolis, and
the following one
probably at Washburn
town, I hope you

will be able to attend
the latter.

The new Geological
Society did little. Its
members scarce seem
to know exactly what
they aim at. It is to
meet in New York
in December, and
many of the leading
members desired me
to ask you to attend
if possible. Bell is
trying to put himself
forward as a Canadian
representative man, but
they evidently don't like him.
All are well at present,
and I hope will be home
end of next week. Ever yours
Madame
