

295. University St.
Montreal.

July 4/95

Dear George,

I have your
 long and interesting letter
 of the 1st, and shall
 read it again with care.
 The matter is certainly one
 in which the Canadian Press
 should have some decided
 doctrine as soon as it can.
 In so far as the Genevill
Series, with which I am
 chiefly interested, is con-
 cerned, it is plain that
 in New Brunswick, and
 I think also in the Ad-
 m-

Inducks and New England
and farther south, as
as here, closely associated
with the Lower Laurentian
and has shared in all
its movements. It also
in New Brunswick includes
rocks of decidedly Huronian
type, and far below
the Laurentian Cambrian
and unrecognizable to
it. This Grenville series
does not seem to be dis-
tinctly visible in the west
but it is quite probable that
some of the crystalline rocks

There may ultimately be
required as if the
same age, this should
be looked into

I enclose a letter from
a gentleman in British
Guiana. Perhaps it was
intended for you, though ad^d
directed to me. In any
case it would be a
gracious act to give the
little South American colony
any help you can. Per^h
haps you may have received
a similar letter. If you
will return it, I shall

See if any thing can be
done by our Museum
Here.

Mamma and I send
all good wishes and
loving regards

Ever yours

J. M. Dawson

P.S. I propose on Monday
to draw interest on Harbor
Bonds and to send you
a cheque. This is on July 5th.

J. M. Dawson

I have mailed copies of
my two last papers to you
