

42 Avenue 80
London

Dear George,

We arrived here all
right last evening and have
taken rooms here where we
are near to most things
We have seen Raubine and
Mamma has had a long
talk with Grandma, I hope to
then mutual satisfaction.
She has gone out this P.M.
to select something for your
gift. Marie seems to waver
between a pearl neck lace
and a diamond set, either

of which we find would be
acceptable, and would come
well within the liberal
margin you have allowed
for Mamma.

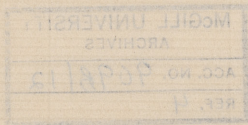

I went to the Bank
this morning, and got 12
bank cheques for you, which
Mr Lang undertook to forward
at once to Ottawa by mail.

The weather here has been
very dry till this week, when
it has been showery. It is now
fine again and quite summer-
like.

We are to dine with Strana
this evening in a quiet way,
and I have arranged to visit
with my carboniferous butcheries
at the Royal Society on the 18th.
I hope to see Lydsker and
other experts in such matters here
for that time.

I am sending to William
a paper by Fleming on "Ocean
Highways" which may interest
him. If he has left Ottawa
it may remain till his return,
unless he has left instructions
as to forwarding such things.

With all love from Marjorie
Raukine & myself, believe me
Yours ever
J. M. Dawson

We are to share with you
this evening in a great way,
and I have arranged to do
it in my collection of botanical
at the paper given on the 18th.
I hope to see you at the
other reports in such matters as

for that time
I am sending to William
a paper of "Journal de
" which may interest
you. I have left Ottawa
it may remain till the return,
which he has left instructions
as to forwarding back things.
With all due from
I am, my dear
Wm. Brewster
