

M^r Gill College.
Montreal.

Thursday

to the all your objections
I feel as if you had
been trying your death
warrant. P.

Dear George

No need for apology
I'm not writing to different
members of the family at present,
for myself I am too earnestly
anxious to hear every word you
write about, "for & against".
to be at all particular to whom
it may be addressed. Indecision
is the hardest state, I only hope
you have had more philosophy
& been less sensual than I

I am sorry I touched the question
in writing or clanked Jupp's
statements as it may be one
grain more of ignorant
influence thrown into the
worry & Cal. I met Mr. Hamilton
at Mr. Johnson's last ev. & he
was talking about the two openings
which has made me feel more
than before how much you
should be left to act upon
your own judgment & promptings

As I now return to abill issues.

I must not omit to thank
you that occupied as you
as you did find time to
give me some news.

It is said that the Cook's have
to part with the crew & promising
a young man as I hear this loss
John is. W. Sutherland junr. died
last evg leaving his father a very
lonely mourner - not likely however
to be long behind. Johnny Farnum
a son of David F. is near death.
Herbert at the gate was thought
dying last Tuesday night but

passed the crisis for a time.
I should fear never again
to be able to work.

Mrs. H. Bancroft ^{of Mattie} ~~is in town~~
I called while I was out two
days ago. I am hurrying to go to see
them today. Dr. Hunt is also here.
He expresses much regret at not seeing
you. He is really a kind hearted
fellow & wishes you wd attend a
meeting of Engineers at Boston soon
to take place. Do please at your earliest
convenience give us a lengthened account
of your lectures &c.

With much affection

your loving Mother
Papa says let P. I have received his form of
application & will attend to it.
