Mc Gill Col
July 11/86

Dear Rumbine,

We had a solemn
funerary last evening about
our voyage to England. Mamma
and Eva are desirous to go
as early as possible in Spring.
I cannot leave till 1st of
July. Now one element in
the calculation is how it
will suit your return and
your plans for the summer.
We calculate that you may
be back in London 1st
week in April, which is earlier
than they can hope to be
over. Will you remain in
England for some time as

2
You the two lines, on paper advised
and the books you wish can be sent
I do hope if receiving it with pleasure
and you when they go.

Have had no farther light as to the
purport of Governor, and do not expect any
the letter. Serge received a letter a week ago
from a friend at St. Michael, asking him
to recommend some good physician to that
locality; but says you have the wrong
to take you there, & do not suppose that
would be desirable plans. Serge however says
there are a number of good steps promised
settled there,

With respects to the first part

To meet them or will you
name to leave, say for Vienna,
before they can be over. If
we knew your movements we
could time theirs for as to
quit.

Now I think the best way
will be for you to cable us
from London or better to send
on a cable from Brindisi or
Marseilles so as to inform
us. "Ducum, Montreal" will
do for address and we
may understand as follows —

"Vienna" = immediate departure,

April } = remain over three
May } months in England

teeth }
twentieth } = time in April when
or (the year) } you may have books

same }
adding } = time in May for
May } you leave

of the letter, we may of course receive
letters from you which may throw further
light on the matter, more especially on
Frank's manner. He's already written to me
before.

They will (I think) please do not allude
to this in writing at all (in any way) that mamma
has. You will answer about Mrs. Keble's
and that we reason why she writes to
for one early is on that account and
also to prevent you about it.

Take this letter as my
piece of business, and give as a
contribution for some to guide our
I should be sure that these things
little by & by will, from our
Mamma
