My dear Colonel:-

With reference to our conversation of
December last re: medals for McGill University, will you
please inform me how many you will require. The medals are of
bronze and silver.

Hoping to hear from you in the near future.

With kind regards,

Yours very sincerely,

Dear Colonel Papineau:-

Many thanks for your letter of
February 3rd. I am awaiting letters from the various
deans reporting on what medals they would like.

Yours sincerely,

Wilfrid Bovey.

February 8, 1927.

Dean H.M. Mackay,
Faculty of Applied Science,
McGill University.

Dear Dean Mackay:-

His Honour the Lieutenant-Governor has offered to present one silver and one bronze medal to each Faculty and School in the University, to be given to the student who leads in some particular subject.

Will you be kind enough to say whether you would like one or more of such medals and for what subjects you would award them.

Yours faithfully,

Sent to all heads of Faculties and Schools.

Dear Sir Arthur:

I have received your letter of February 8th,
which reports the Lieutenant-Governor's generous offer of
medals to faculties and schools in the University.

We could make use of one silver and one bronze medal
to very good purpose in the School for Social Workers, to be awarded
to the two graduates with highest and second highest aggregate
standing. If the medals are to be awarded in the various
Departments of the Faculty of Arts, we would certainly do the same
thing in the Department of Sociology.

Dear Sir Arthur:

With further reference to your letter of February 8th regarding the medals of His Honor the Lieutenant-Governor, I beg to state that in my own opinion and in the opinion of the Staff, these medals would best serve their purpose by being awarded as follows:

1. Silver Medal: To be awarded to the student who passes for an Intermediate Diploma and takes the highest standing in the written examinations.
2. Bronze Medal: To be awarded to the student who passes for an Intermediate Diploma and takes the second highest place in the written examinations.

Will these medals be available for the end of the current session? If so, would you please let me know so that notification may be made to the students in plenty of time before the examinations begin.

Dear Mr. Principal,

In reference to your letter of the 8th instant, in which you notified me that His Honour, the Lieutenant-Governor, had kindly offered to present one silver, and one bronze medal to the Department of Commerce, I think that we might well give one of these medals to the student with the best average throughout the four years of his course in the group of subjects comprising Accountancy, Business Organization, and Commercial Law. I think that the second medal might be given to the best average throughout the four years in the French and Spanish languages. In this way we should be fostering a closer relationship with our French co-frères in this Province, and with the great group of Spanish speaking Republics in South and Central America.

I am putting this matter on the agenda for our next meeting of the Commerce Committee, which we purpose

to hold on Friday, the 25th instant, at 4 o'clock, if
that date is suitable to you and to the majority of
our members.

Yours very truly,

Extract from Minutes of the Faculty of Law, 21 February, 1927

Donation of Medals by the Lieutenant-Governor

"The offer of the Lieutenant-Governor to donate medals to the Faculty was then considered. It was moved by the Dean, seconded by Professor Corbett and resolved that the Lieutenant-Governor be asked to donate a silver medal for the final examination in Roman Law. The question of the bronze medal was then discussed. It was moved by the Dean, seconded by Professor Chipman and resolved that the bronze medal be awarded for the course in Obligations in First Year."

Dear Sir Arthur,

I have been considering the matter of the medals which His Excellency the Governor-General is so kindly giving to the various Faculties and Schools of the University.

From your letter I am not quite clear as to whether we are entitled to only one silver and one bronze medal, or whether, these being for the Faculty of Music, there would also be others for the School of Music.

In all cases it is thought that the best way to award them would be on the results of the sessional examinations, which would include consideration from both the theoretical and practical points of view. This, again, would not take any cognisance of the extra-mural examinations in Music held throughout the Dominion, the recipients would be those attending the Conservatorium. Undoubtedly, medals for extra-mural work would stimulate interest in our scheme of examinations throughout the Dominion, but perhaps this would be asking too much from His Excellency.

Yours very truly,

MEMORANDUM FOR COLONEL BOVEY

At the last meeting of the Dental Faculty the matter of the Lieutenant Governor's silver and bronze medals was dealt with. The Faculty decided to award these as follows,-

- a. Silver Medal to the student of the final year obtaining the highest marks in Operative and Prosthetic Dentistry, both practical and written;
- b. Bronze medal to the student in the final year obtaining the highest marks in Pathology and Therapeutics combined.

Sir Arthur Currie, G.C.M.G., K.C.B., LL.D.,

Dear Sir Arthur,

After careful consideration of the question of the disposal of the medals offered by His Honour the Lieutenant-Governor, I would suggest that one silver and one bronze medal could be fittingly awarded in the Department of Architecture. The silver medal might be awarded to the student obtaining the highest standing in the graduating class, and the bronze medal to the student coming second, always provided that their work is of sufficient merit.

A British Association bronze medal is now available in each of the Engineering departments, and one such medal is awarded to the student in the graduating class who attains the highest standing in each of these departments, provided that his work is sufficiently good. A British Association medal is also available in the Department of Architecture, but inasmuch as the work of that department is quite distinct from that of the Engineering departments and in some aspects has particular relations to the life and culture of the Province of Quebec, it would seem to be fitting to award the Lieutenant-Governor's medals in the Architectural course.

For some years past Professor Traquair and his associates

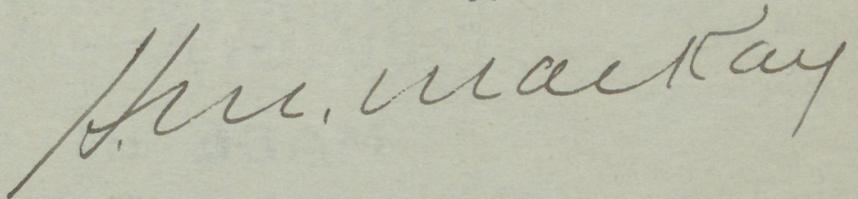

Sir Arthur Currie, (Continued)

2.

have done a great deal of work in sketching and photographing the old French architectural features still remaining in this Province. They now have probably the most complete record in existence of the most interesting of these features. There seems to be some indication that this older architecture may be used to considerable advantage in developing a type of architecture suited to the Province, and the work of the Department may therefore be of considerable importance apart from its value in preserving records of the past. Possibly His Honour's attention might be directed to this feature of the work as I have no doubt that he would be much interested; and I think that when a public announcement of the gift of these medals is made it might well be accompanied by a statement of the work of the Department in this connection.

The above suggestion as to the disposal of these medals has been approved by Professor Traquair, and has been favourably received by several of the principal members of the Faculty whom I have consulted.

Yours faithfully,

My dear Principal,

Forgive me for not answering your letter to me of February 8th at an earlier date. The reason for this delay has been that the acceptance and allocation of medals and prizes can only be made by the Faculty in full session. I need hardly add, however, that I know that the whole Faculty will appreciate very highly indeed the courtesy and kindness of His Honour the Lieutenant-Governor of the Province in offering these medals for competition in the College. I shall suggest to the Faculty, which meets on Friday next at 4 p.m., that the silver medal be awarded to the student standing highest in the final or fourth year honours in the Department of History, and the bronze medal to the student in the second year achieving the highest standing in Latin and Mathematics. This allocation may, as I suggested, be changed by the Faculty itself, and if it is I shall notify you immediately.

Dear Sir Arthur:

His Excellency the Governor General of the Dominion grants a prize annually to the student who is first in the Art of Teaching. This medal, however, is an annual one and in view of the prizes already given in the School for Teachers, I would like to know whether the silver and bronze medals are to be annual awards or merely given for one year only, namely, for 1927.

If they are to be endowed or maintained in some manner in perpetuity for a number of years, I would like to give the matter careful thought and have the medal awarded for some of our most important branches of work, in other words, give ~~them~~ a dignity approaching that of the Governor-General's medal.
