Dear Macintosh

Dear Macintosh,

Thank you for your letter of June 25th., I was interested to hear of your talk to American Army Anaesthetists and I must thank you for your rather flattering comments regarding my own share in the work with Curare. I believe that Col. Tovellis back in America quite enthusiastic about the possibilities for Curare in Military Hospitals. I am sorry that I have not yet had a chance to talk with him. I am enclosing a copy of an article which I have just sent on to the editor of The Lancet. It contains nothing very original, but I hope that it covers some of the points which you wished to have discussed. I certainly thank you for the opportunity to bring my contribution before such a distinguished British Medical Audience. If there is anything in the paper which you do not think should be published, please don't hesitate to say so.

I thought you might be interested also in the enclosed copy of a recent news letter which I have sent out to the R.C.A.F. Anaesthetists. I find that these periodical circular letters have done much to keep the boys on their toes and to help them to feel that someone is interested in their work.

Next time I am in Ottawa, I will speak to the D.M.S. and ask him whether there is any possibility of extending an official invitation for you to visit the Canadian Air Force Stations with me.

In reply to your inquiry about Canadian Distributors for your book, I think the best Canadian Medical Book Distributors are McAlinsh & Company of Toronto.

Dear Macintosh,

Thank you for your letter of June 25th. I was interested to hear of your talk to American Army anesthetists and I must thank you for your rather flattering comments regarding my own share in the work with Gwers. I believe that Col. Tovey's book in America quite enthusiastic about the possibilities for Gwers in Military Hospitals. I am sorry that I have not yet had a chance to talk with him. I am enclosing a copy of an article which I have just sent on to the editor of The Lancet. It contains nothing very original, but I hope that it covers some of the points which you wished to have discussed. I certainly thank you for the opportunity to bring my contribution before such a distinguished British Medical Audience. If there is anything in the paper which you do not think should be published, please don't hesitate to say so.

I thought you might be interested also in the enclosed copy of a recent news letter which I have sent out to the R.C.A.F. Anesthetists. I find that these periodical circular letters have done much to keep the boys on their toes and to help them to feel that someone is interested in their work.

Next time I am in Ottawa, I will speak to the D.M.S. and ask him whether there is any possibility of extending an official invitation for you to visit the Canadian Air Force Stations with me.
