Col. Bogie bones of femur etc in Kough P.H.

hd. O. 1. billions - ? for board procedure.

hd. G. 9.45 - scapula 53 - dist. - oedema - long
best acute fibillation - a few scales of bases

Stress on the
to Comm Dept

20/3/18 Station No 26 - fever - enlarged spleen
lit. double from in Jov. - softness of, be side
at l. base + some subcostals - enlarged spleen,
Liver not enlarged.

7.15 Swollen at hand - both hands were
had it still sore. No heat of gov. or abundant
fever - no discharge - Ac. Mem. Perc. Org B.

had pneumonia M2. faint at base 3rd rib level left
apex of ribs also 3rd rib in v. as, one spot
in rt. C.L. Harpos. fever ^{103°} P 100, R 28 -
dilatation of base

had P3. Bennett - faint fl. - hit left side - v. high
fever - no sputum - dulness lll. & patch of bronch.
(Spot blood under examination)

Pit high temp - cold for 2-3 days - watery eyes
Tusky rash on abdomen - back ? m. d. s.

29/3/18 - 2nd disposal of 2 1/2 R.R.

P3, 23 - pneumonia, patch l. C.L.

P.T. 9 Jaundice lll. at rt lung fever

P.T. 12 - fever - pain rt side - effort apex
l. C.L.

M pneumonia M2 - seen yesterday - bloody sputum
signs after l. apex - also heat at l. l. C.L.

Wed M. 16 4 days ago? still faint bil. - no spitting
R. 24, T. 103 - friction below heart T. faint
fract gave C.L. no bl. br. v. o. a little
reduced herpes left ear.

4 male workers to stay in K

30-3-8 Wed B. 2. named Saddler - diarrhoeal
fever ^{coming} 2 days - acid sweat - headache - faint
in small of back - no spitting. Pale - ? stay but no
admirable - heart o.k. when talk to Eng as P.H.O.
Wed W. care c running fever.

Wed M. 3 ? The (72) nothing found.

Wed M. bed 16 no spitting T. 103 P. 88 R. 20 - faint
left side flat left hand bl. br. & many roles
Heart well inside ruffle. ul gone - ? fluid base

Wed P. 3 3/4 bronchopneumonia - 2 delirium at ll. suffices
T. 103 - this morning was bl. br. & many roles
no brach. now - T. dropped for 103.5 to 100.5
Wed R. 3.35 - T. E. Jones - high fever - pulse 80-90 R. 22-24
headache - faint in back - faint at abdomen - cough
delirium bl. br. & faint creasles -
W. J. not much in T. of greater over still.

disposal?

Wed. Feb. 19. V.D. 9. - ? bunch hair - ? female
lower chest - dulness both bases - ? bronch
prolonged expiration - rales.

3/27/18 Wed. No. Boyd bed 16. - P.O. or w/ky

M. 6. Tallotson ? fluid at base - displaced heart.
No rusty sputum - fluid obtained

M. 16 signs fluid left chest - alot obtained

M. 24. Some rhonchi - ? all dulness at base
no bl. brs

Wed. D. no 6. Redden no spleen

Wed 7/11. Neilson and Loran - immobile

l. chest - ? all deep heart inwardly - suds front
head - flatness to 5th rib in Crapilla

Scap. tip to scap behind - tip gone up
to 9th ribs V.D. reduced all over

More at base - bronch patches near

- 1/2 of scap. lines subs h.s. reduced at base
at the breadth 1/2 way down dist. bi. ^{no def. further} at apex.

42

ll. br. l. ill. (part) no spasm,
Wed P. 11. 19. Ill since 31/3/18 - dull mentally
high fever 103 - no hist. of sharp pain - no spasm
signs of R. effusion on left side.

Wed. A. 3. 5. 9. nothing def. - constipated pale
headache -

wd 03.31. ? dysentery - spleen palp. - who's history
mucous + - streaks of blood - abdomen not tender
no spots - clean tongue no heat of pulse

wd H. Brink H. IV. 4. Malaria in Africa

in 1916 (June) - 1/2 day attacked since - found in
bl. in King George Hot in winter 1917 - Attalus media
on admiral base from 2 Stat. Chilliest
rise to 104° 2' - spleen not palp. Headache
now better

wd. K. 2 Whalley - vegegam - recommend
to transfer to med wd:

3 adult wd Pz Balch skullies both bases
? fluid clear - yellowish green sputum

wd. P. 1. Monroe - l.l.

P. 3. 35. from sputum - bloody - very marked in bl.
Med B. Jenkins - hb from str. l.
to Pitt.

4-4-10 wd. M. 10 act 49 & left then plague
wd the 2 & fat big fever

wd X. Chen - headache fever 103° - abdomen
D.K. no spleen not palp. Pitts OK

no rigidity of neck - 4th cervical about - no
behind on turning - Watch

^{Wheeler}
9.11.31 Wind at base - ok - few - Kermit Cole
106-102 since 30th March - headache - bad
fever in abdomen - now dirty grey - spleen as felt
no rose spots - chest o.k. Send to 14 St. As? ^{system}
D 68 ^{admission} - ? Seabirds 2 days - temp 99° last night

Wed R.F. 35. Ill since 31st - pain at back
Consolidated, frothy reddish brown sputum.

Wed R.F. 29. Ill since 2nd. pain at back
from low down - chill - by sp. cough up
~~the~~ a few yellowish brown mucus some
fresh blood streaks. Consolidated at all behind

A 3 61. Melkham - S.W. at frontal lobe - he has been
30/3/08. Has become drowsy & get drowsy answers
questions, at pupil does not react to light - no paralytic of
oc. muscles made out - head rotated to left & rigid
neck. No rigidity elsewhere - left abdomen repleated

decreased - left crepitation greater than right. ^{Left} ~~Right~~ pleural jerk
Cost - present on both sides. Double Kernig.
Sclerous in patch over C.C.L. - change in voice
snds, no bl. breathing.

Wed. Apr 16. fever to 103° - dirty tongue - f.p.f.
Spleen - Even to 14 Stab as Enteric.

5-IV-18 W. bed 2, Holbrook - Temp 101°
has been unwell in bed - P. 108 - felt
chilly yest. sweating a great deal ^{mostly} a few
rattles in chest - heart o.k. spleen not palp-
to stay in bed. Has gas through gut + large gut
though ashld paper to see.

6-IV-18 autopsy Addison's disease

7-IV-18 Bailey - wd no bed 53 - wd
(spatter) inside l. arm & thr. at p. can
(2 bullets) Spitting thick reddish m. of red
fem. bl - fair l. lower chest - less mor
subcutan crackling w. s. reduced
Heart well in - br subreduced to Credé
Crackles hide all other signs - no suggest
of wud. of chest.
