October 7th, 1918.

My dear Malloch,

There is to be a full dress discussion on the influenza epidemic, at the Royal Society of Medicine, on the afternoon, and I think evening, of Wednesday, Nov. 13th.

General Rolleston, who is to be in the Chair, discussed the matter with me yesterday, and asked for Canadian support. I suggested to him that you were the one man to take up the morbid anatomy of the lung condition in true influenza pneumonia, and to discuss how far this is associated with the presence of the influenza bacillus, how far your experiences during the last eighteen months tally with those of the more recent epidemic.

Would you care to come over for this if duly instructed, and could you bring over the specimens, or

135, Oxford Street, W.1.

better still lantern illustrations? They would only want about ten minutes talk, but in that time you could make your main points.

Let me know your feelings in this matter, and then I can take action.

Yours sincerely,

J. G. Alderman

Captain T. A. Malloch,

and quote

A.M.D. 8/12-1-12.

To:-

Captain A. Malloch,
No. 3 Canadian General Hospital,
B.E.F. France.

My dear Malloch,

The General has instructed me that you are to attend and take part in the discussion on Influenza on Wednesday, Nov. 13th.

I would suggest that you put yourself in touch with General Sir H. D. Rolleston, 55, Upper Brook Street, stating exactly what material you have and asking for his advice regarding what he specially wishes to have presented. He will be Chairman, and wants to have the papers short and snappy, and it would be wiser to take up one, or at most two points, rather than several.

Yours sincerely,

J. G. Curran

Colonel, A.D.M.S.
For Director-General,
Medical Services, O.M.F.C.

Oct 30

Dear Captain Malloch,

Thank you very much for your letter and for your summary of what you propose to say before the meeting. This is just ~~what~~ what we want. It would be well to let J. y. W. MacAlister at this address know what microscopes and powers you want, and if you could like the epichiascope to show drawings etc.

I think that you might well ~~it~~ to speak twice (a) on the bacteriology and (b) the morbid anatomy.

With kind regards
yours v. truly
J. R. Rolleston

The D.M.S.,
Canadian Section,
1st Echelon, GHQ

G-211-18

Major C.F. Martin, CAMC
O., i/c Med., Division.
No. 3. Can. Gen. Hospital.

With reference to my DRLS G-211-18 of the 29th ult., I beg to inform you that three Medical Officers have reported this morning from No. 8 Canadian Stationary Hospital for temporary attachment during the present crisis, to relieve officers at present sick in hospital.

Captain D.S. Lewis is now back on duty. I therefore feel that there is no necessity now for retarding Major Martin's return to England as far as this hospital is concerned whenever his recall comes through, particularly as I understand his services are urgently needed there.

Captain T.A. Malloch will be able to carry on quite well as Officer i/c of Medical Division now that Captain D.S. Lewis is back, and that a number of Medical Officers are available.

I would like to have Colonel Hardisty as O., i/c Medical Division whenever his services can be spared, but there is no necessity for these as long as Captain T.A. Malloch is available, and allowed to carry on the position.

Brig-General A.E. Ross, C.B., C.M.G.,
D.M.S., Canadian Section,
1st Echelon, G.H.Q.,

Dear General:-

I have just received a personal letter from Lt. Colonel Hardisty, O.C., No. 6 Canadian Field Ambulance, in which he informs me that he has changed his mind with regard to the proposal some time since to relinquish his command and take over the duties of Officer i/c Medical Division of this Hospital.

These reasons appear to me to be very sound, and I can quite understand his desire to remain with his Unit. As far as this hospital is concerned, it can quite well carry on with Captain T.A. Malloch as Officer i/c of Medical Division, without any other senior officer being appointed to fill the position. Captain Malloch has already carried out these duties to the satisfaction of everyone concerned since the beginning of this year, with the exception of a short interval during which the duties were carried out by Major C.F. Martin. I consider, however, that Captain Malloch should be granted the acting rank of Major, in order to give him the increased authority which would be carried by such rank. I have already forwarded my recommendation officially to this effect, and I trust you will be able to have this acting rank granted as soon as possible.

Yours sincerely,

Boulogne.
