

To Dr. Flick from W. O.

1 West Franklin St., Baltimore,
November 2nd, 1903.

Dear Flick:

All right! Musser will be good-looking enough to introduce me.

I would like to have Mr. Phipps at dinner, please, and we could dine at the Club at six perfectly well, which would be a great deal better than five, and I would like to arrange to ask you and Musser and Wilson and Tyson to meet him.

I will do anything you and other good men and true wish in the matter of bringing the International Congress of Tuberculosis here. I do not know anything about the American Congress of Tuberculosis. They have never sent me any literature nor any invitation, but from all I hear it is evidently not in the hands of the right men. I think it would be well for you and Ravenel to have a conference with Welch, Biggs and Councilman and others, so that a systematic attempt could be made to put matters on a proper basis.

Sincerely yours

W^m Osler.
