

To Dr. Flick from Mr. Clark Bell.

Medico-Legal Journal, New York,
Nov. 28, 1903.

Lawrence F. Flick, M.D.,

Dear Doctor:

Please send me for review and notice your book "The Crusade against Tuberculosis."

I take pleasure in enclosing you the splendid endorsement of the U. S. Government of the United States on the American Congress on Tuberculosis, and the action of the Worlds Fair Exposition of 1904 in creating a committee on organization of an International Congress on Tuberculosis at St. Louis, Oct. 3, 4 and 5, 1904.

That Committee named by the Worlds Fair Management are considering adding names to that committee, and to the Honorary Vice Presidents of the Body, - there are reasons why this should not be tendered any one without consent and our officers requested me to learn if you would be pleased to have your name submitted for such distinction.

With high regards,

Faithfully yours,

Clark Bell.

I mail you Jan. No. of their Journal as a sample.
