Collected with W.O.'s and Bibliog in Index Catalogue O. p. 235.

There are many diff. points of view between a hypophyseal and a strictly bibliographical index. The former is more interested in the dates of presentation and in the period during which the work was done than in the date of publication. In Mrs Bis. bibl. Index from which papers presented for example in 1875 might not appear in her list till 1880. Even reports of discussions lack the usual notes and are incomplete here.

Cut out all Collected Reports & note that you have a printed index by MacCallum. May determine further material. Eg some dates & list of case Med. Ch. Montreal reports. Eg: date of case Path Socy Montreal vols. Eg of Jt. Socy.
