

To Thayer. CUS417/34.1

17th

Dear T.

I am so glad that
you are seeing Mrs Clark. I
feel sure there must be malig-
nant disease but I could write
out nothing definite. Give
Miss Bessie my regards. There
is just the possibility that it is
a neuritis with eclampsia as
like Prof Woods case. She
has had no end of worry, but
the persistence of the symptoms
is suspicious

So glad to hear that sister -
Susan is better. The Lord
will set her up
all well here.

Yours

M.D.
