Dear T.

I am so glad that you are seeing Mrs Clark. I feel sure there must be malignant disease but I could make out nothing definite. Give Miss Bessie my regards. There is just the possibility that it is a neurosis with Eclasia etc like Prof. Woods case. She has had no end of worry. but the persistence of the symptoms is suspicious

So glad to hear that Sister Susan is better. The trip north will set her up all well here.

Yours

W.O.
