Dear Dr. Cushing

- (1) Sir William's inspiration was behind the issue of the "Religio Medici", although he did not in any sense edit it for Press. He planned writing an introduction, but unhappily this did not mature.
- (2) Is our New York House to address the six copies to your American address?
- (3) I have put the photographs in hand. I shall show the three vignettes which will leave the question of oval or square still open for the last stage. The fourth of course is in any case square.

Yours very sincerely

J. du P. Johnson
