

CU5417/4.31

(This letter was not dictated but written by Sir William himself in bed).

Nov. 21, 1919.

To Peyton T.B. Beale, Esq., Southampton. Surgeon.

In 1902 your father published anonymously Religio Medici etc. - where could I get a copy? Who was the publisher? I should like also to have a letter or bit of MS or one of his drawings to put in the book. I was brought up on Beale, and his early writings on the Microscope helped me enormously.

P.S. I collect all the Religio's - both Browne's and the others.
