Dear Fisher

*Sibellus*

*Sibellus?*  
Have you the 1485 "Opus repertorii prognosticon, with the  
Hippocrates ~~Sibellus~~ de medicinis astrologia - the beautiful type & initial  
letters &c of Ratdoli. No 50 of Redgraves list? if not I can send a copy  
as another one came bound with a recent acquisition. I hope all goes well  
with the library. I wish I could spend a couple of days with you. I am  
not doing much - my card catalogue is completed at last & I am getting the  
books rearranged. My secretary is away but I have a nice fellow from the  
Bodleian who comes in for part of each day. Tell Dr. Henry to please send  
me that paper of his on the bookworm. I have a drawing of a bookworm at work  
that will make the Library Committee sit up. Hope you will have it as an  
Xmas present.

You will have before long a typed copy of my list of Med.  
Incunabula to 1480. Go over very carefully and put Lib. Coll. Phy. Phila.  
after any you have. It has been a deuce of a job, but I hope it is fairly  
complete.

My love to the President & to the members of the Library  
Committee.

Yours ever

<sup>m</sup>  
W Osler
