Oxford.

Dear Fisher:-

I send you a list of English and American practitioners in Europe, which may be useful for some of the Fellows whose patients are going abroad. It gives the names of men who practice in different towns and Spas.

I am glad to hear that the new building is going on so rapidly. I am anxious to get the Gross family interested in the proper furniture for the Gross room. I suppose it would not be before this time next year that the question of furniture will come up. Don't you think they should send you abroad to look up incunabula and shelving and a few other trifles about which they know nothing on this side? You will be very proud when you get into the new building.

Sincerely yours,

Wm Osler
