

"OXFORD MEDICAL PUBLICATIONS."

OXFORD UNIVERSITY PRESS.

HODDER &amp; STOUGHTON.

16, Pembroke Crescent,

W.

13th Feb 07

Dear Professor Osler .

I have your card of today's date and have telephoned to Dr Horder I had thought of driving down to Oxford but don't fancy driving back in the dark all the way ( I am rather an ancient Motorist) Might we arrange to see you at 5:30 there is a train which reaches Oxford at 5:10 I could see Collier afterwards and perhaps my friend Townshend and Whitelocke and catch the dining car back at 8:14 . This would suit me better as I am glad to say I have more work on my hands than I can do this week .

Re The System on Syphilis .

I will hope to hear from you that you can do the clinical part on the medical side . Power asks me to tell you that he intends to take the Surgical part under the following heads-

History  
 aetiology  
 Broad Pathology  
 Anatomical Characteristics  
 Symptoms and Course  
 Diagnosis  
 Prognosis  
 Treatment

he wants to know whether this has your approval if so he will see that the other authors conform to this general line of text .

I have heard from Mott he is quite eager to do anything he can he has some very beautiful illustrations .

~~Chalmers-Watson~~

I have heard from him and he has practically settled to contribute a work entitled " Clinical Studies on Nutrition" I have advised that this should be accepted , it would be ready quite soon .

Stevens .

I would be very glad to see the MS of this work when it reaches you , I take it ? You quite understand that the publishers desire to accept it on your recommendation provided that the author considers their terms proper .

Adami's Book on Pathology .

Is it possible that the Press could get this ? . I have not liked to write to him as all he knows of me is of so entirely a personal character , but you know what sort of a book it is likely to be as I do .

very sincerely yours

William Osler Esq MD FRS  
 13 Norham Gardens  
 Oxford
