

Johnson must have had difficulties ^{in accepting} ~~with~~ Darwin and Huxley much as Darwin
 would have on the little doubt but that that was a Darwin Oidontography as
 the morphology of the teeth of living animals may have been seen by him the
 possibility too expensive for him to possess. At all events he cut and
 selected a goodly batch of anything that was available according to his
 own. ^{knowledge} When ^{to} ^{find} one of the earliest works just the manuscript is ^{as follows}
 Johnson was charter member of the Royal Microscopical Society (to which he belonged later)

In this collection batch of specimens we find what appears to be the address
 Murray, Glasgow and my inquiry a May 20 & May 27 1867 he is at Dundee for
 the number in case 13 new species and some Diatomaceae
 I don't know in what collection together or not for 1868
 W. Odier name does not appear till Mar 24th when he sends him ^{four} ^{small} ^{specimens} *Batrachospermum*
 confusion

Johnson had seen him days with the section of the *Trichina spiralis* where he notes it for
 yllidias etc. human occasionally death.

We may imagine W.J. in his trouble at the British turn to his material needs &
 his message for relief.

Note that Nichol's treatise "Die Lehre von den Trichinen"
 appeared in 1866 2nd edn.

Confirmed at Wester Mar 28 1866

cf founder in Johns Johnson 8/15

Unity College School

at Wester or Parsonage

Parsonage Jan. 1866 - Oct 1867

Influence of W. Johnson

Entered Day 18 1866

I believe the Rev. W. Johnson was not of Wester
but founder of the school or had been at Wester before.

Bowell was physician to the school - also Prof. in law. in phys. chem.

Two, Mr. Kersey, and Guyon write that in an old Dunlop Calendar there
are full details of the school incl. a note that W. Johnson later a
scholarship in the University.

They also that a group of naturalists visited there for even his classical
master gave a prize for the best collecⁿ of birds, plants, insects & fossils &c

The staff of Dunlop University were visitors of the school was a museum for
the diving - Journal.

Two, talks full and extensive with Rev. W. Johnson about entering the church
and photographic first year at Dunlop - was later with the speculation.

George from Connelton ^{paper} (about other Rev's who were in school) who
were interested in science & C's application in form note.

Edo, J. Rogers among the boys there cf. Colorado and paper of letter

In 1868 W. Johnson established a fund of \$100 in memory of W. Johnson to be awarded
to the boy who, by his place (among competitors from the school in Honour Science at
the University Examination, won by the boy in 1869

W. Johnson was Rector of Wester & became Warden of the school
he founded in (opened) May 1865 - c. 9 pupils Rev. Boddy, Hend Master.
Sept 1865 - a split - school moved to Parsonage & Boddy
Johnson Kepton again also at Wester but no go
