PETER BENT BRIGHAM HOSPITAL
BOSTON, MASSACHUSETTS

Ans. paper on Diatomacea 1870

Received by the Recording Secretary

at the Oct. 31st 1870 meeting

~~If W.O. had been copied by some one a
 little more accurate in science - still
 a grossly taken on on gills & pedicels
 in fact they were none better than in
 science. As it was Powell fluctuating
 with. Chances & science is so many others
 would say at the time it was probably
 Powell had turned the scale & had
 been a more fixed point than
 would have affected himself personally.~~
