from Calaveras Horrid

Wes's upls.

school in Canada. All
y^r. friends here will be much
pleased on your account.

I expected to have missed
you on y^r. arrival from
Europe as you must have
had lots of recent information
to impart - and as I wanted
to hear of your doing - but
you know what I was
about - and no doubt - will
forgive me. I hope soon to
see you here and to hear
of y^r. affairs - Till then
I remain

Very sincerely yours

P. O. M.

W. Marshall

Mr. Keble

47 Queen's College

July 6. 1874

My dear Mr. Keble

I have just rec^d.
from a meeting of the
Faculty of the College at
which I am happy to be able
to inform you it was agreed
to recommend you to the Seniors
of the College for the office
of Lecturer upon Resolu-
tions in the room of Mr.
Drake who resigns as

account of ill health.

You have not been spending
your time in vain and
working at practical physiology
and most heartily congratulate
you upon the fine
prospect that our opens before
you. The fees of the students
will at least meet your
actual expenses for board
clothing & the position in
the college will afford the
strongest proof to the public

that you are at least ~~not~~
a well qualified physician
and that experience is all that
you require to merit their
patronage. I would advise
you to come down at once,
hangout your shingle,
and set actively to work
up your lectures - you will
find the time short enough.
Walter can be of much assistance
and is willing to be; and
he has a fine collection of
& diagrams drawings etc

May 21

and a good many mounted
specimens which will be of
use to him: he will no doubt
dispose of to you very liberally.
You will rec: an official letter
from the Dean no doubt by the
same mail that conveys this
answer it at once -

The time is a favourable one
now for it to enter
upon practice - for altho. you
will have to wait for that
like others - labour will pro-
ceed upward in that
field also - Please present
my congratulations to your father
upon this gratifying recognition
of your merits by the oldest Medical
