152 Mansfield St.

Montreal

My dear Cushing

I think that in
one of my letters Osler
describes Mills' death.
In August some six
years ago - Mills after
consulting Osler became
Prof. of Physiology at McGill.
Osler & all of us at that
time gave summer courses
The ^{winter} session then ended
in March & we had a
Summer session May
June July, or rather middle
of April to middle of July

Ober did Clinical Medicine
I gave a special course
(\$15) in the microscope
in Medicine 24 lessons.
The McCall Calendar of 1880.
I am fine an account of these
courses. We all took a tour
at the Hotel at Tadousac. I
know I spent a month or
two in the summer there in
'76. The for-fer^d - Low Dufferin
had his summer house ^{at Tadousac} ~~there~~
& they wished to have a doctor
at the Hotel which gave us
free board - we ^{embryos} ~~all~~ when
there attended the for-fer
& family. - Truly yours
J. Shepherd
