With great industry he had put together a volume of reports for the
M.G.H. Pathological Laboratory.

The following review appears in the Canadian Jour. of Med.Sci. vol.III,1878,p 176

MONTREAL GENERAL HOSPITAL PATHOLOGICAL REPORT FOR THE YEAR ENDING MAY 1st,1877.
by WILLIAM OSLER, M.D., of Mc Gill University. Vol. I. Montreal: Dawson Brothers,
Publishers, 1878.

We gladly welcome this first pathological report from a Canadian hospital. It contains interesting records of cases from the post-mortem book of the General Hospital, which throughout bear witness to the well-known industry of the talented author. Dr. Osler's reputation as a pathologist and physiologist, already so high both at home and abroad, gains additional lustre from every production of his active brain and pen. We regret that space does not allow us to give our readers some extracts from this admirable volume. The cases, (some of the more important of which have already appeared more in detail in the Canada Medical and Surgical Journal) are carefully reported, grouped on an anatomical basis, the system of inspection of Virchow at the Charité Berlin having been followed. The book is dedicated to Dr. James Bovell of Toronto.
