> For nearly a year before his death symptoms of declining vigor were apparent to his friends, and signs of grave disease of the heart were discovered. The death last year of his son, Dr. Andrew Hamilton, of Melbourne, Que., was felt very keenly by him, and he never fully recovered from The fatigue of a hurried railway journey undertaken at the time. To the end, however, he was cheerful and resigned, though loth to depart, and on Christmas day, when the writer of the present sketch saw him for the last time, and on leaving spoke of his long and honorable career, he replied that nothing would please him better than to exchange his rusty old

body for a young and active one, and work on for amother eighty

years.

Luckene Seen that he stendied aware his colleges of forego ferroduct that Som office becoming a Tablashed its orrestated and it was in the spring of the me fell medical breaks, for their spring the first water patients.

British this was been been the me fell medical breaks, for their spread being the two waterproduct stacked.

British the water patients.

British the water patients.

British of the some type he so because full supported in Ballimin. Of the Shideness foreign.

Its

on April 1877, was to "afford opportunities, which after graduating you can never obtain, of learning how to prepare papers and to express your ideas correctly, while your meetings will also secure for you a training in the difficult science of debate". Osler was its first President, but all the other officers were undergraduates, and the whole proceedings were in the hands of the members. Osler, however, never missed a meeting; he joined in all discussions and generally closed each meeting with a general review in which he combined much criticism and suggestion. A literary character was often imparted to the meetings by the reading of short selections from notable authors ranging from Shakespeare to Dickens.

Durn the Ensumer bession rep to the July him well meetings were held and on the aforms of the second on the and to the second of their second and to the second of their second of the form may to folly where the first of the second of the form of the second of th
