

dependence in character being likewise paralleled in human dependency. This view is sustained today the term Koch's bacillus having been established for pig typhoid.

At this time he was shot on the Council which arranged for the meetings of the Natural History Society and the program for July 25<sup>th</sup> was given over to the Microscopical Club ~~and~~ <sup>the</sup> Medical Students ~~was~~ <sup>being</sup> invited. His topics were upon the different modes of microscopical illumination and a number of instruments <sup>showing the new methods</sup> were demonstrated. His persistence in the introduction of the microscope into ~~its~~ <sup>its</sup> proper relation to medicine was being fruit.

He was thus engaged the next month corresponding for a clinical position appointment at the Montreal General, and in his account book there occurs a <sup>long</sup> list of people whose support he solicited as is the custom ~~is~~ for applicants for positions in British or Canadian institutions. He ~~must~~ <sup>must</sup> ~~have~~ <sup>must</sup> ~~the~~ <sup>must</sup> ~~name~~ <sup>must</sup> ~~of~~ <sup>must</sup> ~~the~~ <sup>must</sup> ~~persons~~ <sup>must</sup> ~~who~~ <sup>must</sup> ~~interviewed~~ <sup>must</sup> ~~solicited~~ <sup>must</sup> testimonials from a hundred or more of his professional acquaintances

a distasteful procedure and it is little wonder that thirty years later

~~that~~ he finally refused to repeat the process <sup>in his case to Edwin Bayne</sup>

His printed appeal <sup>to which an ~~entire~~ <sup>entire</sup> ~~list~~ <sup>list</sup> ~~of~~ <sup>of</sup> ~~his~~ <sup>of</sup> ~~papers~~ <sup>was appended</sup></sup> reads as follows:

Dear Sir

List of his papers

though according to all precedent he was expected to do so

1028/74/10

Confidential
