

On November 7th, 1881, W.O. read a series of microscopic notes

Sept. 1881

CUS417/77.17

(which will be published in a future number) and this probably refers

to the **B**iology **N**otes published June 27th, 1882. Though these are

brief they nevertheless show so clearly the characteristics of acute

observation possessed by the young naturalist that they deserve copy-

ing in full.
