HENRY H. DONALDSON
NEUROLOGY

THE WISTAR INSTITUTE OF ANATOMY AND BIOLOGY
PHILADELPHIA

June 22, 1920.

Dr. Harvey Cushing,
Boston, Mass.

My dear Cushing:-

I have yours of the 18th touching the matters relating to Osler. Offhand I cannot reply concerning the history of the Anthropometric Society, as I believe it was called, but in a few days I hope to be able to send you definite word.

The brain is here and in good order, but I have not yet studied it. Have you any suggestions as to such a study, especially in relation to use which you would like to make of the results.

I find that I have only three brief notes of inquiry concerning the Vesal Ikonography and a little biological club in the history of which he was interested. I send these on merely to help you out with dates but I should like to have them back when you are through with them just for the sake of the signature.

I am glad the responsibility of telling the story has fallen into your hands and I shall be glad to be of any assistance that I can.

Yours sincerely,

Henry H Donaldson
