(Dr. H. V. Ogden)
30/6/83

Dear Ogden:

Very glad to get your letter and to hear that you are progressing. Oddly enough I was on the Mountain this afternoon and met Mrs. Barnard with a troop of friends and among them the lady you mentioned. I shall call tomorrow or the day after. Things here are pretty quiet, but the changes, as you will see by the announcement - to be mailed on Tuesday - have been numerous, and I hope for the improvement of the teaching of the school. Stewart will be a great acquisition. He is still in Vienna but will return in time. A. A. Browne and Gardner will make a good pair for Obst. & Gynecology. Penhallow, Asa Gray's assistant, takes Dr. D's botany lectures this winter. Dr. D. goes abroad for a year. That blooming Y. C. M. R. D. is in Winnipeg looking after Convention practice. We are joyful in the prospect of the \$100,000 endowment. We have \$40,000 of the 50,000 necessary to secure the equivalent sum from our anonymous friend.

Buller keeps well; he has moved to a mansion on Dorchester St. I am next door, i. e., in Brown's, until his return and then I don't know where I shall go - perhaps with Stewart.

R. J. B. H. ^{comes out} in Oct. to take the Jr. Dem. of Anatomy. He has passed the Primary of the F. R. C. S. Did you hear that the R. C. P. Lond. had honored me by electing me a Fellow? I feel very grateful, as my period of probation as a member (5 years) had scarcely expired. All are well at 66. Mrs. F. has had rather a bad time with rheumatism, but is now better. The children are very jolly and often talk of you. Willie, only this evening, was laughing at the remembrance of giving you the mumps. Tell Dorland I will send him a formal invitation to the C. M. A. meeting - also the other Dr. The papers will be most acceptable. R. I hear is getting on. Write again soon.

Yours sincerely,
Wm. Osler.

G. C. is well. He is to call this P. M. for your note.

*College of Physicians. Cf. the Substantive Lectures July 26 '85. Still more gratified to
admirer Osler more from afar and did not appreciate him at his true worth
when he came to live in his studies. Cf. Newfound Letter.*
