Mar. 12, '84.

Dear Schäfer,

I have picked out the names of the Doctors from a preliminary list which has been received. Sanderson has written to say he will come. I leave on the 26th for Germany via New York and Bremen and shall not stop in England on the way. Otherwise I should be delighted to stay with you at Elstree. I will let you know when I shall be in London, probably about July 10th. Glad to hear the Laboratory work progresses so well. I am afraid we shall not have much to show you here. You will be interested in Bowditch and Warthin's Laboratories, the only good ones on the Continent. I shall be in Berlin, and if I can do anything for you or bring anything over let me know. Poste restant will find me.

Yours sincerely,

WM OSLER.

P.S. I was nearly forgetting the most important point. I am breaking up home and my arrangements for the Autumn are as yet uncertain, so that I have asked Prof. and Mrs. ^{Morse} to look after you and Mrs. Schäfer during the meeting. You will be much more comfortable with them and Morse you may possibly remember. He was in the Physiology class in 72-3, 73-4 and took the Medal or Scholarship at the University. He went into literature afterward and came out here a few years ago as Prof. of English Literature. He will write to you and arrange matters.

Yours etc. W.O.
