(To Dr. H.V.Ogden from Dr. Frank Buller)  
694 Dorchester St., Montreal  
May 20, 84.

My dear Ogden

I have had a sort of guilty feeling towards you for a long long time on account I think of not having answered your first letter tho' in this respect I have had a large supply of the reputed of Infernos on hand all the time. Now you fairly heap coals of fire on my head by so promptly sending me your kind congratulations on the important domestic event that has comparatively recently transpired in my establishment (on second thoughts I am not at all sure I did not answer your letter some months after it was received, be that as it may I am prompt this time). If you ever come to Montreal and fail to make 694 Dorchester it your home whilst here you will have committed the unpardonable sin. The above No. is something like a home now, graced by the presence of the sweetest and best woman in the world "tho I says it as shouldnt". Never mind, Ogden, I hope soon to hear that you have done ditto. & Cantlie, how about Cantlie. I fear much for his morals since he is no longer under my guidance and protection and since he is exposed to all the wiles and temptations prevalent in the wickedest city in the world. Osler had nothing to say! and has left for parts unknown, at least unknown to me, for I have not heard from him since he went away to Germany I think.

Summer session in active progress. I have succeeded in inspiring the 3rd year men with a wholesome dread of next spring and have a great class.

Yours ever

F. Buller

*Buller's answer!*
